A guide for the Consumer Relations Manager · ST3 to ST7

CONTENTS

What this is

The five channels

Not yet, in progress, live

Running the list

The university drawer

Working a channel

The three list channels

Tasks

Moving between the two

What this deliberately does not do

Example one: turning on the advisor listserv

Example two: adding your first student organization

Example three: getting permission, then activating a professor

What good looks like

A guide for the Consumer Relations Manager. What was built, why it works the way it does, and how to use it to run ST3 through ST7.

WHAT THIS IS

University activation was, until now, kept in meeting notes and in your head. Which advisor agreed to send the flyer, which chapter shared it, when the job posting was last checked, whether anyone had asked about professors yet. That worked at four universities. It does not work at forty.

The workspace turns that into a record. Two new tabs sit in the MedJobs In Basket:

- **Universities** shows every campus and the state of its five channels.
- **Tasks** holds the follow-up work the system generated for you.

The design principle behind it is worth stating plainly, because it explains almost every decision below: **you record what actually happened, and the system works out what it means.** You will not find a status dropdown anywhere. You tick off real steps, and the status follows.

THE FIVE CHANNELS

The channels are unchanged from the operating model. What is new is that each one now has a written definition of what makes it live, and the system holds you to it.

	Channel	Live when
ST3	University job board	The posting is submitted, approved, and confirmed visible to students
ST4	Advisor listserv	The advisor has agreed to send the flyer to their listserv
ST5	Student organizations	At least one organization is activated
ST6	Campus events	At least one event or webinar is activated
ST7	Professors and class outreach	Approval obtained, and at least one professor has agreed

ST3 and ST4 are single switches. They are either arranged at this university or they are not.

ST5, ST6 and ST7 are lists. A campus can have four student organizations, two events and nine professors, each activating on its own schedule. Adding one is a button; each keeps its own contacts, its own history and its own next check.

NOT YET, IN PROGRESS, LIVE

Every channel and every record moves through the same three states, and you never choose them.

Not yet is where everything starts. Nobody has done anything.

In progress happens automatically the moment you tick the first step.

Live happens automatically when the last required step is ticked. The system stamps the date, shows a brief acknowledgement, and creates your next follow-up.

There is one state you do choose: **not available here**. Use it when a channel genuinely cannot work at this university, and say why. A dead job board recorded as dead is useful. A dead job board left blank looks like work nobody did.

Records inside the list channels can be **declined** in the same way, for the organization that says no or the professor who is not interested. A declined record stops appearing as unfinished work.

Activation is recorded once and never removed. If a channel later goes quiet, the date it first went live stays on the record. It did happen, and that fact does not expire.

RUNNING THE LIST

Open **Universities**. Every campus is a row, and the five channels read left to right in the same order every time. A **red dot** beside a university name means something there is due or overdue.

1 · UNIVERSITIES

UNIVERSITY	JOB BOARD	LISTSERV	STUDENT ORGS	EVENTS	PROFESSORS
● Ohio State	● Live	● Live	● 2 of 4	● 1 of 2	● 1 of 3
● Michigan State	● Live	● In progress	● Not yet	● Not yet	● Not yet
University of Florida	● Live	● Live	● 3 of 3	● 2 of 2	● Not available
UT Austin	● Live	● Live	● 4 of 4	● 1 of 1	● 2 of 2

Exhibit 1. The Universities tab. Work top down; when the red dots run out, you are done for the day.

Universities with a red dot sort first. Click any row to open that university.

THE UNIVERSITY DRAWER

2 · UNIVERSITY DRAWER

Ohio State 2 of 5 live · 3 in progress ● ST3 University job board Activated 14 Sept 15 Dec ▶ ● ST4 Advisor listserv Activated 21 Sept ● 5 Oct ▶ ● ST5 Student organizations 2 of 4 live 12 Oct ▶ ● ST6 Campus events 1 of 2 live 8 Jan ▶
--

Exhibit 2. One university, its five channels, and nothing else.

The line under the name is the whole summary. Each channel shows its status, how far along it is, and the date it is next due.

There are two things to click on a channel row. The row itself opens the workflow. The **date** on the right leaves the drawer and takes you to the task that explains what to do.

WORKING A CHANNEL

Inside a channel you find the same things every time, in the same order.

The screenshot shows a web interface for a channel named "ST4 Advisor listserv". At the top, it says "3 · ST4 EXPANDED" and "Activated 21 Sept 5 Oct". Below this is a "LIVE WIN" section with a checklist:

- ☒ Advisor sent the current flyer 19 Sept
- ☒ Advisor agreed to distribute it 21 Sept
- ☒ Distribution confirmed 21 Sept

Below the checklist is a "SUGGESTED EMAIL" section with a "Copy" button. The email text is:

Subject: A paid option for your pre-health students

Hi Dana Whitfield,

Attached is the one-page flyer I mentioned. It explains how students can pick up paid caregiving shifts that work around a class schedule.

Would you be willing to send it to your pre-health listserv? Happy to change anything before you do.

Thanks,
[Your name]

Below the email is a "CALL OR MEETING SCRIPT" section with a "Copy" button. The script text is:

I sent over a one-page flyer about paid caregiving shifts for students. It is written so you can forward it as is.

Would you be able to send it to your pre-health list this month? I can adjust anything first if that helps.

At the bottom, there is a "Mark not available here" link and a "HISTORY (1)" toggle with an "Add note" button.

Exhibit 3. ST4 expanded. Live win at the top, then contacts, the copy you can send, and history.

Live win is the checklist. Tick what has actually happened. Each tick records the date automatically, so you never type one.

Contacts default to the university advisor. Where the real contact is someone else, a career services officer for the job board or an events office for a fair, add them.

Suggested email and call script appear where the step involves asking someone for something. They are short on purpose. A partner who has to edit is a partner who does not send. Edit them freely and copy them out; the workspace does not send mail.

History is collapsed until you want it, with the count on the toggle.

Mark not available here sits at the bottom and asks for a reason.

Sam Ortiz ►

Exhibit 4. ST5. Each organization is its own record with its own live win and its own next check.

Student organizations. An organization is live as soon as its leadership agrees to any one meaningful way of reaching members: sharing the flyer in a group chat, emailing it out, or arranging a presentation. One is enough. Each live organization gets its own monthly reconnect.

Campus events. Add both kinds, webinars we host and university events we join. An event is live when five things are true: a leader identified, host approval obtained, a date scheduled, a presenter assigned, and collateral ready. The same five work for a webinar and for a career fair. This channel also carries a **semester review**, which arrives on its own so nothing sits unlooked-at for a term.

Exhibit 5. ST7. The approval block sits above the list, and the list does not exist until it is cleared.

Professors. This channel is gated. **You cannot add a professor until approval is recorded**, because we do not prospect faculty until a university has told us we may. Record who can give that permission, then record it when it arrives. Once a professor agrees, either to pass the opportunity on or to let us join a class, they are live and come back to you seasonally.

TASKS

Everything recurring is created for you. You never pick a task type from a menu.

Due 5 Oct

WHAT THIS IS

Send the advisor fresh copy for this month's listserv send.

WHY

The advisor forwards what we write. If we do not write it, nothing goes out.

STEPS

1. Write this month's copy: subject line, three sentences, and the link.
2. Email it ready to forward, unedited, under their own name.
3. Confirm a send date before closing this task.

SUGGESTED EMAIL

Copy

Subject: This month's copy for the pre-health list

Hi there,

Here is this month's note, ready to send as is.

[three sentences and the link]

Is there a day this week that works?

Thanks,

[your name]

CALL OR MEETING SCRIPT

Copy

I have this month's copy ready for the list. It is short and written so you can send it as is. Is there a day this week that works for you?

DONE WHEN

The advisor has this month's copy and a send date is agreed.

Mark done

Skip this cycle

Repeats every 1 month. The next one is created when this is closed.

Exhibit 7. A task opened. What it is, why it matters, the steps, the copy, and what done means.

Mark done closes a routine check and schedules the next one at the right interval. If you could not do it this cycle, **Skip this cycle** moves it on without claiming you did.

Custom tasks are for work the five channels do not describe. Give it a name, a date, and your own checklist of what needs doing.

New task

TASK

09/15/2026

CHANNEL (OPTIONAL)

None

DETAILS

CHECKLIST

What needs to be done

+ Add item

Cancel **Create**

Exhibit 8. A custom task, with your own checklist items.

MOVING BETWEEN THE TWO

Every path goes both ways. A next-check date in a university opens that task. A task names its university and channel as a link back. A red dot anywhere leads to the item that caused it. You can start from either tab and never reach a dead end.

WHAT THIS DELIBERATELY DOES NOT DO

It does not send email. It does not assign work to anyone, because one person runs this today. It does not report on which channel produced a student, because we cannot yet measure that honestly and a plausible number would be worse than none. It does not detect a channel that has quietly gone stale.

Those are choices, not omissions. Say so if any of them starts costing you real time.

THREE WORKED EXAMPLES

The three things you will do most often, start to finish.

EXAMPLE ONE: TURNING ON THE ADVISOR LISTSERV

The most common activation, and the one that shows how the system chases a step for you.

STEP 1. OPEN THE CHANNEL

The advisor meeting agreed she would send to the pre-health list. Open Ohio State, then ST4.

ST4 · NOTHING DONE YET

● ST4 Advisor listserv

Not yet activated ▼

LIVE WIN
The advisor has agreed to send the flyer to their listserv.
All required.

☐ Advisor sent the current flyer

☐ Advisor agreed to distribute it

☐ Distribution confirmed

SUGGESTED EMAIL Copy

Subject: A paid option for your pre-health students

CALL OR MEETING SCRIPT Copy

I sent over a one-page flyer about paid caregiving shifts for students. It is written so you can forward it as is.

Would you be able to send it to your pre-health list this month? I can adjust anything first if that helps.

Exhibit 10. One tick. The channel is now In progress, and a follow-up appeared for 26 September.

Two things happened without you asking. The status moved to **In progress**, and the system created a task due in seven days to find out whether she agreed. You do not have to remember to chase this.

STEP 3. ANSWER THE FOLLOW-UP WHEN IT COMES DUE

Seven days later the task is in your Tasks tab.

Confirm advisor agreed to distribute the flyer

Ohio State · ST4 →

Due 26 Sept

WHAT THIS IS

You sent the advisor the flyer. Find out whether they have agreed to send it to the listserv.

WHY

The send only happens because we ask. A flyer sitting unanswered in an inbox is not a channel.

STEPS

1. Check for a reply.

2. If there is none, follow up directly. A short note or a call is usually enough.

3. Answer below once you know.

SUGGESTED EMAIL

Copy

Subject: Checking on the flyer

Hi there,

Just checking on the flyer I sent last week. Would you be able to send it to your pre-health list?

Happy to change anything first.

Thanks,

[your name]

Exhibit 11. This task asks a question rather than setting a chore, so it offers an answer instead of Mark done.

If she agreed, click **Yes, they agreed**. That ticks the second box back in the university record. The task and the checklist are the same fact, so they cannot end up disagreeing. If she has not replied, **Not yet, ask again** pushes the task out a week and leaves the box alone.

STEP 4. CONFIRM THE SEND, AND THE CHANNEL GOES LIVE

Tick **Distribution confirmed** once the email has actually gone out.

Exhibit 12. All three ticked. The channel is Live, dated, and the monthly reminder is already scheduled.

You will see a brief acknowledgement, and the next check appears on the card. From here the workspace asks you once a month to send her fresh copy, which is the only reason the listserv keeps going out.

EXAMPLE TWO: ADDING YOUR FIRST STUDENT ORGANIZATION

STEP 1. OPEN ST5

Exhibit 13. An empty channel. There is one button, and it is the right one.

STEP 2. ADD THE ORGANIZATION BY NAME

Click **Add organization**, type the chapter name, and press Enter.

The screenshot displays a web interface for managing student organizations. At the top, it says "ST5 · ONE ADDED". Below this is a header for "ST5 Student organizations" with a "0 of 1 live" status and a dropdown arrow. A message states "At least one organization is activated." The main content area shows a single organization, "AMSA Chapter", with "Priya Raman" as the officer. Under the heading "LIVE WIN", it says "Leadership agreed to any one of these. Any one is enough." and lists three options, each with an unchecked checkbox: "Share the flyer in a group chat or membership channel", "Email the opportunity to members", and "Host or arrange an Olera presentation". Below this is a "CONTACTS" section showing "Priya Raman · President" and a "Mark declined" link. At the bottom of the organization card is a "HISTORY (0)" section with an "Add note" link. A dashed box at the very bottom contains a "+ Add organization" button.

Exhibit 14. Added, with its officer recorded. Nothing is agreed yet, so it sits at Not yet.

Each organization has its own live win, its own contacts, up to two, and its own history. Reach out to the officer.

STEP 3. TICK WHICHEVER MECHANISM THEY AGREED TO

The chapter president says she will post it in the group chat. Tick that one box.

4 · ST5 EXPANDED

Mark declined

► HISTORY (1)

Add note

Pre-Nursing Society

Jordan Blake 8 Nov ►

Public Health Club

Sam Ortiz ►

Exhibit 15. One tick is enough. The organization is Live, and its monthly reconnect is scheduled.

Any one of the three is enough, because a group-chat post and an all-members email are both real distribution. You do not need all three, and the system will not ask for them.

Notice the channel now reads **2 of 4 live**. Adding a fifth organization tomorrow will not undo that. The channel goes live on its first live record and stays there, so adding more work is never punished.

EXAMPLE THREE: GETTING PERMISSION, THEN ACTIVATING A PROFESSOR

The one channel with a rule the system enforces rather than trusting you to remember.

University Activation

CONTACTS
Dr. Elena Marsh · emarsh@osu.edu

SUGGESTED EMAIL Copy

Subject: A brief note for your students

Dear Dr. Elena Marsh,

Dana Whitfield suggested I write.

We work with local care providers who hire students for paid caregiving shifts that fit around coursework. It is clinical-adjacent experience, and it pays.

Would you be willing to pass the attached flier to your students? If it

Exhibit 17. Approval recorded. The professor list is now open, and the outreach email cites the person who cleared it.

Add professors one at a time with their department and course. The suggested email names the advisor who gave permission, because that is what makes a cold email to a professor land.

STEP 4. SEND, THEN RECORD WHAT THEY AGREED TO

Tick **Outreach sent** when you write to them. That moves the professor to In progress but does not make them live, which is correct: contacting someone is not the same as their agreeing.

When a professor agrees, tick either **Distribute the opportunity to students** or **Allow a brief class visit**. Either one makes them live. If it is a class visit, record whether it is virtual or in person, when, and which team member is presenting.

Each live professor then comes back to you seasonally, roughly four times a year, which is the rhythm that matches how terms actually turn over.

WHAT GOOD LOOKS LIKE

A university that is working properly has channels that are live and dates that are in the future. Not five live channels: a campus with a dead job board and no faculty access, honestly recorded, is in better shape than one with five blanks.

The stage does not close. Every other stage in the funnel ends in an outcome. This one ends in a standing commitment: postings expire, officers graduate, a fair moves, a listserv only sends when someone asks. Each

channel is two motions, secure it once and then keep it alive, and the second is what decides whether a university produces students in the spring as well as the autumn.

The workspace exists to make the second motion ordinary daily work rather than something to remember.
